

BULLDOG BATTERY

THE RELIABLE
ENERGY SOURCE

*Safe—
Easy—
Convenient*

The charger is fully automatic complete with a DVDT auto start/stop and is matched to the battery.

Safety features include flood resistant partition minimizing water and electrolyte damage.

Maximum ventilation is provided for cool charger operation. Minimizing the heat transfer to the battery.

The battery and charger are connected with an SB connector. An additional set of leads are provided for the truck connection. All that is required to charge this battery is a 120 volt AC wall outlet. The operator does not need to unplug the battery from the truck and then plug the charger into the battery. This system will eliminate the error of charging with truck instead of the battery.

| 12-100B-11 | 24 | 500 | 31.375 | 12.875 | 26.25 |

Safe, Easy and Convenient

BULLDOG BATTERY, INC. is proud to offer the Bull-Pak as the only efficient and economical solution for light duty walkie-truck applications. Bulldog's engineering makes the Bull-Pak series one of the safest battery and charger combinations on the market.

The BULL-PAK Operation:

1. "Safe" because you do not need to unplug the battery from the truck, and connect it to the charger. This battery has two sets of leads provided. One set is connected to the truck and the other is connected to the charger. The operator only has to plug the AC cord into a 120 volt AC outlet.
2. "Easy" because the operator only needs to find a 120 volt AC outlet and plug in the charger to recharge the battery. The charger is an automatic start/stop, with a DVDT allowing for near perfect recharge, which will help eliminate over charging.
3. "Convenient" because the charger is always with your equipment, wherever it is needed.
